

## CLEAN POWER PLAN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, 3 years ago, the Obama administration took a very positive and important step towards curbing greenhouse gas emissions by initiating the Clean Power Plan, the first-ever national limit on carbon pollution from power plants. The plan was devised to give States the option to tailor how they would reduce carbon pollution, following benchmarks set by the Federal Government.

For years, States, local governments, businesses, and universities have been making progress towards a low-carbon future, both in anticipation of full implementation of the Clean Power Plan and spurred on by a variety of other forces. Now, the Trump administration has vowed to unravel the Clean Power Plan, but the momentum will not stop because of this reckless act.

Donald Trump and Scott Pruitt cannot repeal engineering, science, or economics. Their attempts would only harm the economy and our citizens, mirroring us in the past to serve the interests of Big Coal.

The case for action in reducing carbon pollution is compelling. The Clean Power Plan encourages steps to reduce the dangerous extent of accelerating climate disruption and attendant extreme weather events.

Hurricanes Harvey, Irma, and Maria are only the latest example of those events. Now, millions of acres in the West are exploding in wildfires. More frequent, more intense, and more dangerous forest fires are the reality now, spurred by climate disruption.

Out-of-control wildfire has touched Oregon's beloved Columbia River Gorge, and the latest instances are in California wine country, taking lives, destroying property, and damaging crops.

Regardless of your view on climate change, the Clean Power Plan is a very important step for the United States. It stands on firm legal ground. The Supreme Court has ruled on three separate occasions that the EPA has the authority and the responsibility to protect our families from carbon pollution.

Cleaner energy and a cleaner environment under the Clean Power Plan would improve the lives of working Americans. By 2030, it would prevent 90,000 asthma attacks, 300,000 days missed from work and school, and 3,600 premature deaths every year.

Instead of protecting human health, particularly those in communities most impacted by carbon pollution, Trump and Pruitt are seeking to tilt the energy playing field back in favor of Big Coal.

Make no mistake: without subsidies and regulatory favoritism, most old, dirty, coal plants would have been shut down years ago if they had been re-

quired to meet carbon pollution and air quality standards, as they should have been.

Trump and Pruitt are making a big mistake when they assault the Clean Air Act and the Clean Power Plan. They are on weak legal ground, and they are on the wrong side of science, economics, the environment, and common sense.

The Clean Power Plan will not be easily unraveled. There is a process to unwind it, similar to what it took to put it in place. It will take a lot of hard work—and evidence that Pruitt doesn't have—to repeal it and prevent the EPA from regulating carbon emissions.

The plan has powerful allies. I am proud to stand with the environmental community, my fellow Democrats in Congress, many government and trade groups, citizens who care, and a number of businesses. Mars is the latest company to announce that they are going to follow through on their carbon reduction plan.

We will continue this fight for a low-carbon, healthier, more economical future. We will protect alternative energy and honor the commitments we have made to the wind and solar industries. We will continue to reduce emissions from our transportation sector by not rolling back fuel efficiency standards.

We will work with the agriculture sector, which makes up 9 percent of the total greenhouse gas emissions. A strong farm bill can reduce emissions and enhance productivity through low-carbon protections.

Ultimately, Trump and Pruitt cannot repeal science, engineering, or economics. I am proud to be part of this effort to ensure that the United States moves forward to exercise leadership in a low-carbon future to fight climate change and global weather disruption.

## PROTECTING OUR SENIOR CITIZENS

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Florida (Ms. ROS-LEHTINEN) for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, I ask for my colleagues' support for the Senior Citizen Protection Act, which I introduced along with my friend, Congressman BRAD SCHNEIDER.

Seniors are valued members of our society, and we must do everything we can to ensure that they can live with dignity and without fear of being abused by those entrusted to care for them.

This bipartisan bill seeks to achieve that goal by creating a national registry for those convicted of elder abuse that will be accessible to senior care providers and families before they make a decision on whom they hire as a caregiver for their loved ones. This national database will bring together local and State registries in order to prevent abusers from continuing to in-

flict suffering on senior citizens by simply relocating from one community to another.

I urge my colleagues to join Mr. SCHNEIDER and me in support of this measure that will help ensure that our parents, grandparents, and loved ones are looked after by professional caregivers who will give them the treatment and respect they deserve.

## CARING FOR SENIORS DURING NATURAL DISASTERS

Ms. ROS-LEHTINEN. Mr. Speaker, I urge my colleagues to cosponsor the Protecting Seniors During Disasters Act, which I introduced with my colleague, Congresswoman LOIS FRANKEL of Florida.

The horrific deaths of 14 seniors in a Florida nursing home facility in the aftermath of Hurricane Irma made it abundantly clear that more must be done to protect seniors during and after natural disasters.

In times of emergency, many senior citizens find themselves disconnected from caregivers and without the treatments and resources that they so desperately need. Our bill seeks to reconnect seniors by requiring that Federal agencies assess how their emergency response efforts impact the elderly. It also calls for the implementation of standards to better protect and care for senior citizens and nursing home residents across our Nation during and after emergency situations.

This is a commonsense, bipartisan legislative initiative that aims to save the lives of many senior citizens and helps ensure that the tragedy that took place in south Florida will not happen again. I urge my colleagues to join us in support of this lifesaving measure.

## BUILDING A NATIONAL MUSEUM OF THE AMERICAN LATINO

Ms. ROS-LEHTINEN. Mr. Speaker, as we continue to celebrate Hispanic Heritage Month and the many contributions of our vibrant community throughout our country, I would like to bring attention to a bill that I have sponsored that would permanently showcase the history and stories of American Latinos.

H.R. 2911, the National Museum of the American Latino Act, will establish a world-class educational institution on The National Mall for the millions of visitors who come to our Nation's capital every year eager to learn about American history.

Latinos have served our great country in every war dating back to before the Revolutionary War and continue to proudly serve in our military. They are small-business owners, job creators, TV stars, athletes, and public servants.

An initiative over 20 years in the making, this museum would be a visual representation of the difficulties that Latinos have overcome leaving their home countries, whether to flee an oppressive communist regime in my native homeland of Cuba, or Venezuela, or for the opportunity to partake in the American Dream, as well as the
